

Portable/Mobile MSR Solutions

Encrypted Store and Forward Using the MagTek® m20 Reader

The Magnesafe™ m20 encrypts card data from the moment the card is swiped. This enhanced security feature accomplishes the card data protection, transaction security, and convenience demanded by today's merchants.

Dozens of transactions can be stored within an m20, and the encrypted information can later be retrieved, decrypted, and processed by ePN's Online Terminal as Swiped transactions.

Merchant Benefits

- No electrical power needed in field.
- No telephone, internet, or wireless needed in field.
- More sophisticated and faster than an imprinter.
- Use invoice or sales receipt for customer signature.
- Eliminates card skimming.
- Compact and lightweight card reader.
- Qualify for card swipe rates!

Features

- Multicolor LED indicator provides reader and device status.
- Stores up to 70 cards at a time.
- Compact size – fits in the palm of your hand.
- Supports USB 2.0 interface.
- Encrypts with 3DES, DUKPT keys.
- Hundreds of swipes per battery charge.
- Meets PCI -DSS security requirements.
